

Infant Mask

A gentle and effective mask for infant sleep-disordered breathing (SDB)

ResMed's infant mask combines the comfort and performance of ResMed cushion technology with special features to protect delicate skin and ensure effective treatment for infant SDB.

Benefits

- Specifically designed with infant care and safety in mind
- Easy to fit and provides rapid access for clinicians
- Floating seal protects delicate skin
- Latex-free

Single-wall bubble cushion

Creates floating seal to minimize pressure on face and prevent tissue breakdown

Cap-style cotton headgear

Elastic Velcro® strap fits comfortably under nape of neck
Soft cotton lining reinforced for gentle yet stable fit
Five-strap adjustment with tear-away strap for quick removal
Air tubing can be secured in an upward position away from infant's reach

Polycarbonate frame

Approved for thermal cleaning up to 122°F/50°C

Swivel tubing connector

Provides stability and flexibility of tube movement

Access port

Easy access to measure pressure
Safety tie to ensure cap remains attached to mask

T-bar extension

Disperses pressure over wider surface area to reduce pressure against the head
Provides extra stability

Forehead pads

Extra forehead pads can be changed for added comfort

Cotton elastic straps

Gently hold mask to face for stability
Soft, embroidered edge reduces chance of facial marks
